

CHECK VALVES

FOR SUMP, SEWAGE & EFFLUENT PUMPS

Richtech Check Valves feature quiet, reliable operation. Each size allows for full flow capacity making them usable in both horizontal and vertical applications.

Choose from 1½" for most sump pumps or 2" for our line of sewage ejector pumps.

Why use Silencer Check Valves?

- Compression technology allows for silent operation
- Full flow capacity gives your pump optimum performance
- 1½" or 1¼" variable attachment to meet your needs
- Sturdy, yet lightweight construction
