

Flexi-Seal Tape

White Flexi-Seal Tape

Features pinked edges for better adhesion and a clean, lay-flat finish. Used to combine sheets of Flexi-Seal and Flexi-Foil together for encapsulation. Can also be used to fasten Flexi-Seal to the foundation wall.

4" x 60 yds.

Double Sided Black Foam Tape

Black foam material creates a super-strong chemical bond with clean, dry block or poured concrete. Once bonded, it has the adhesive properties of tar.

1.5" x 100'

Double Sided Clear Tape

Double sided adhesive for light-duty adherence to block or poured walls. 1 mm thickness creates a low profile against foundation walls.

1.5" x 300'
