

Strip Drain

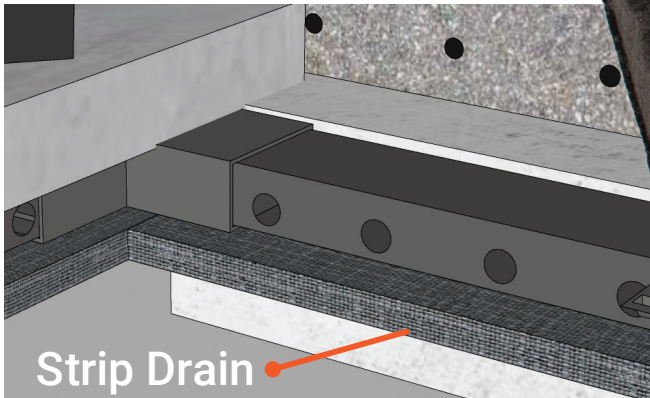

Two-part, pre-fabricated drain

Formed polystyrene core covered on all sides with a non-woven, needle punched polypropylene filter fabric.

Fabric filters soil particles while allowing water to pass through.

Place Strip Drain under QuikFlo to create a dual-channel drain system.

- Pre-fabricated Geocomposite Drain
- Cost-effective alternative to aggregate drains
- Provides rapid drainage
- For basement walls, retaining walls, tunnel & box culverts, floor slabs, Earth-sheltered homes and playgrounds

Place Strip Drain under QuikFlo to create a dual-channel drain system!
