

SUPERSEAL

PREMIUM VAPOR AND MOISTURE BARRIER WITH ANTIMICROBIAL ADDITIVE

SuperSeal

SuperSeal is an ultra-smooth barrier with a clean finish with no wrinkles. It has multiple layers and cord reinforcements that are resistant to punctures and tears.

UV stabilization protects the material from degradation during extended exposure to sunlight. It is also cold-crack resistant and eliminates failures in extremely cold temperatures.

- Low premeability greatly inhibits moisture transmission
- Long life expectancy allows for significant cost savings through reuse and requires fewer replacements
- Class C, ASTM E-1745-11 Standard Specification for water vapor retarders used in contact with soil or granular fill under concrete slabs

Item #	Description
12 Mil	
SS10004	4' x 100'
SS10006	6' x 100'
SS10008	8' x 100'
SS10012	12' x 100'
20 Mil	
SS1000420	4' x 100'
SS1000620	6' x 100'
