

# WELD-ON®

## Weld-On® PVC Cement and Primer

Weld-On® cements have the widest range of high-strength, Low VOC solvent cements for every PVC application, for rigid as well as flexible PVC pipe and fittings. Low VOC cements are environmentally friendly with lower emissions and reduced odor, and they surpass the most stringent regulations. Regular, medium, heavy and extra heavy bodied cements are specifically formulated for PVC pipe in virtually every schedule and in sizes with interference fit from 1/2" to 30" diameter. These products are ideal for use with potable water pressure systems, irrigation, industrial piping, sewer and DWV systems.

### 780™ PVC Plumbing

- Delivers high-strength bonding and stability for a variety of piping installations
- Creates a deep fusion between pipes and fittings with an interference fit up to a 4" diameter
- Suitable for all classes and schedules of PVC, except Schedule 80
- Use for a range of applications, including: potable water pressure systems, sewers, and DWV (drain, waste, and vent) systems

### Plumbing Primer

- Compatible with all schedules, sizes, and classes of PVC and CPVC pipes and fittings
- Helps to promote maximum fusion during welding
- Essential for proper softening and preparation of PVC and CPVC pipe and fitting surfaces for plumbing applications
- Quality low VOC formulation
- Available in clear and purple

| Item #   | Description                            |
|----------|--|
| IPS15900 | 2-in-1 Cement/Primer Twin Pack, 1/2 PT |
| IPS14003 | 780 PVC Cement, 1/2 PT                 |
| IPS14027 | Purple PVC Primer, 1/2 PT              |
| IPS14032 | Clear PVC Primer, 1/2 PT               |
