

# PITBOSS TRIFECTA

## TRIPLE PUMPING SYSTEM

The PitBoss Trifecta Triple Pumping System is an all-in-one, pre-plumbed, ready-to-install powerhouse! Perfect for homeowners who want extra redundancy while managing a LOT of water.

Two 3/4 HP PitBoss primary pumps will work together during big water situations, then the PitBoss Battery Backup pump will take over if power is lost. The battery backup pump will pump up to 13,000 gallons on a single battery charge, keeping the basement dry until power is restored.

For easy installation, double redundancy, and superior water removal, look no further than the PitBoss Trifecta!

### Triple Post Lift System

All components of the Trifecta can easily be placed into the basin with the attached handle and removable triple post lift system.

### Pump #1

PitBoss 3/4 HP stainless steel primary pump #1 is the first pump that will activate. This is a workhorse pump with a switch designed & tested to cycle 1,000,000 times before it needs to be replaced.

### Pumps #2 and #3

The pre-plumbed battery backup combo features another 3/4 HP primary pump along with a DC powered battery backup pump built to pump 2580 GPH at 10' while running on battery power.

### Torque Plate

Custom-designed for the Trifecta System, the torque plate prevents the top-suction PitBoss primary and backup pumps from shifting around the basin during operation.

# PITBOSS TRIFECTA

TRIPLE PUMPING SYSTEM

- Moves big water from a small footprint
- Double redundancy for peace of mind
- Two 3/4 HP primary pumps
- PitBoss battery backup pump
- Pre-plumbed and ready to install
- Specialized torque plate to prevent pumps from shifting in the basin during operation
- 5-year warranty on complete system

## FEATURES TWO

### PitBoss 3/4 HP Stainless Steel Primary Pumps with PitBoss Battery Backup System

Supporting the PitBoss Trifecta is the PitBoss Battery Backup System – a proven, reliable 12 volt battery backup sump pump. When power is lost in the home, the PitBoss Battery Backup Pump runs on DC power, moving the most water of any backup pump on the market.

The PitBoss Battery Backup will pump 13,000 gallons on a single battery charge, while the controller recharges the battery once power is restored.

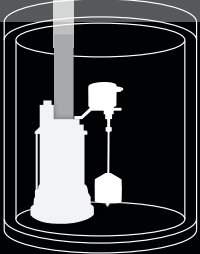

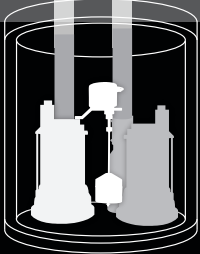

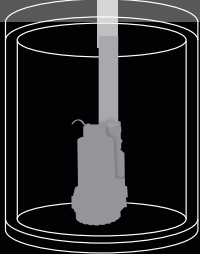

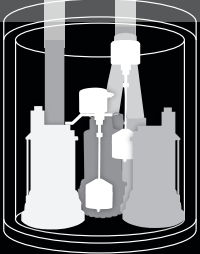

**SINGLE BATTERY CHARGE**

**2,000 CYCLES**  
**13,000 GALLONS**

**BATTERY PERFORMANCE IF BACKUP PUMP CYCLES...**

**Every 5 Min - 166 hrs**  
**Every 2 Min - 66 hrs**  
**Every 1 Min - 33 hrs**  
**Constantly - 5.5 hrs**
