

# PITBOSS+ TRIFECTA

SMART TRIPLE PUMPING SYSTEM

The PitBoss+ Trifecta Smart Triple Pumping System is an all-in-one, pre-plumbed, ready-to-install powerhouse that monitors the health of the primary, backup, and battery. Perfect for homeowners who want extra redundancy while managing a LOT of water.

Two 3/4 HP PitBoss primary pumps will work together during big water situations, then the PitBoss+ WiFi Battery Backup pump will take over if power is lost. PitBoss+ monitors the system in real-time, alerting the homeowner if a problem is detected.

For easy installation, double redundancy, 24/7 remote monitoring, and superior water removal, look no further than the PitBoss+ Trifecta!

### Triple Post Lift System

All components of the Trifecta can easily be placed into the basin with the attached handle and removable triple post lift system.

### Pump #1

PitBoss 3/4 HP stainless steel primary pump #1 is the first pump that will activate. This is a workhorse pump with a switch designed & tested to cycle 1,000,000 times before it needs to be replaced.

### Pumps #2 and #3

The pre-plumbed battery backup combo features another 3/4 HP primary pump along with a DC powered battery backup pump built to pump 2580 GPH at 10' while running on battery power.

### Torque Plate

Custom-designed for the Trifecta System, the torque plate prevents the top-suction PitBoss primary and backup pumps from shifting around the basin during operation.

ASSEMBLED IN USA

# PITBOSS+ TRIFECTA

## SMART TRIPLE PUMPING SYSTEM

- Moves big water from a small footprint
- Double redundancy for peace of mind
- Two 3/4 HP primary pumps
- PitBoss+ WiFi battery backup pump
- Pre-plumbed and ready to install
- Specialized torque plate to prevent pumps from shifting in the basin during operation
- 5-year warranty on complete system

- Patented technology monitors the health of the primary pump, backup pump and battery 24/7
- Sends alerts via the PitBoss+ App if a problem is detected
- PitBoss+ App shows the number of pump cycles per day, gallons pumped, battery health and more, plus manages multiple contacts to receive alerts.

### SINGLE BATTERY CHARGE

2,000 CYCLES  
13,000 GALLONS

### BATTERY PERFORMANCE IF BACKUP PUMP CYCLES...

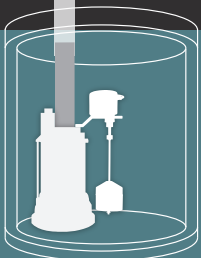

Every 5 Min - 166 hrs  
Every 2 Min - 66 hrs  
Every 1 Min - 33 hrs  
Constantly - 5.5 hrs
